Millennium Xtra

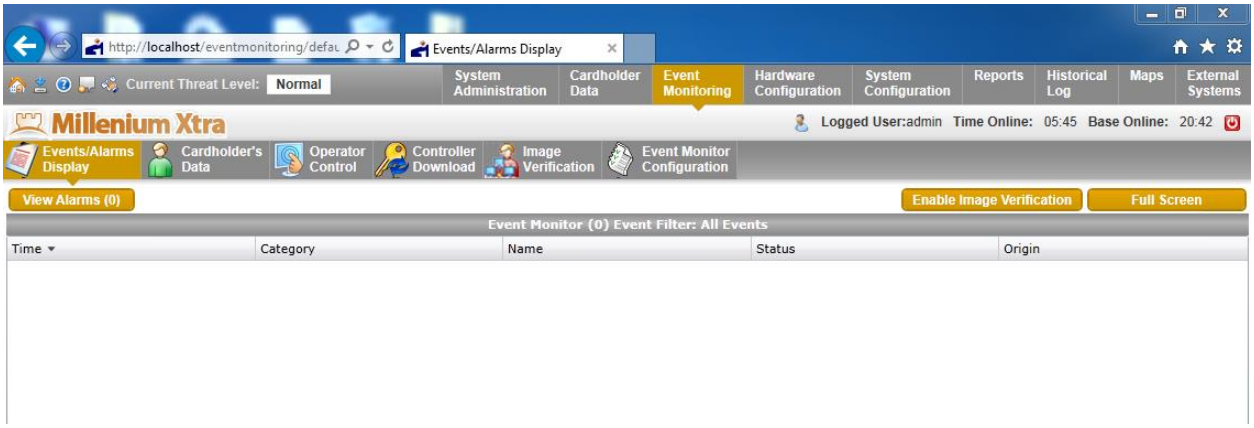
Technical Bulletin

Title: Performing a Full Controller Download in Millennium Xtra

Contents:

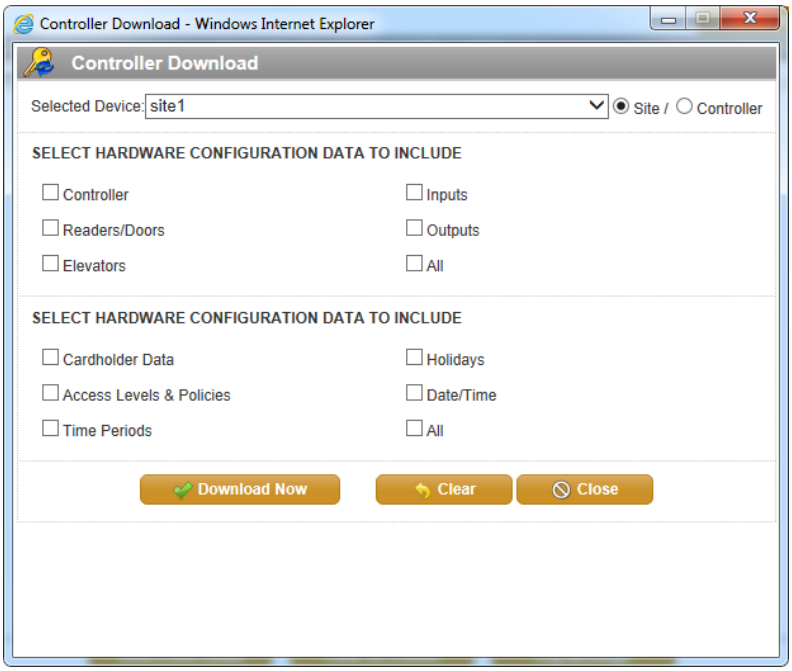
To perform a full controller download, follow the next steps:

1. go to **Event Monitoring**

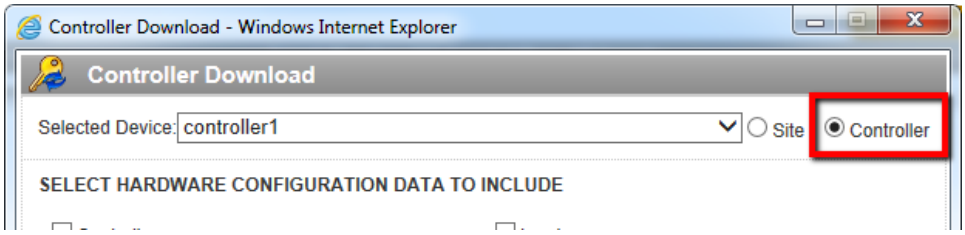


2. Click Download button in upper left corner

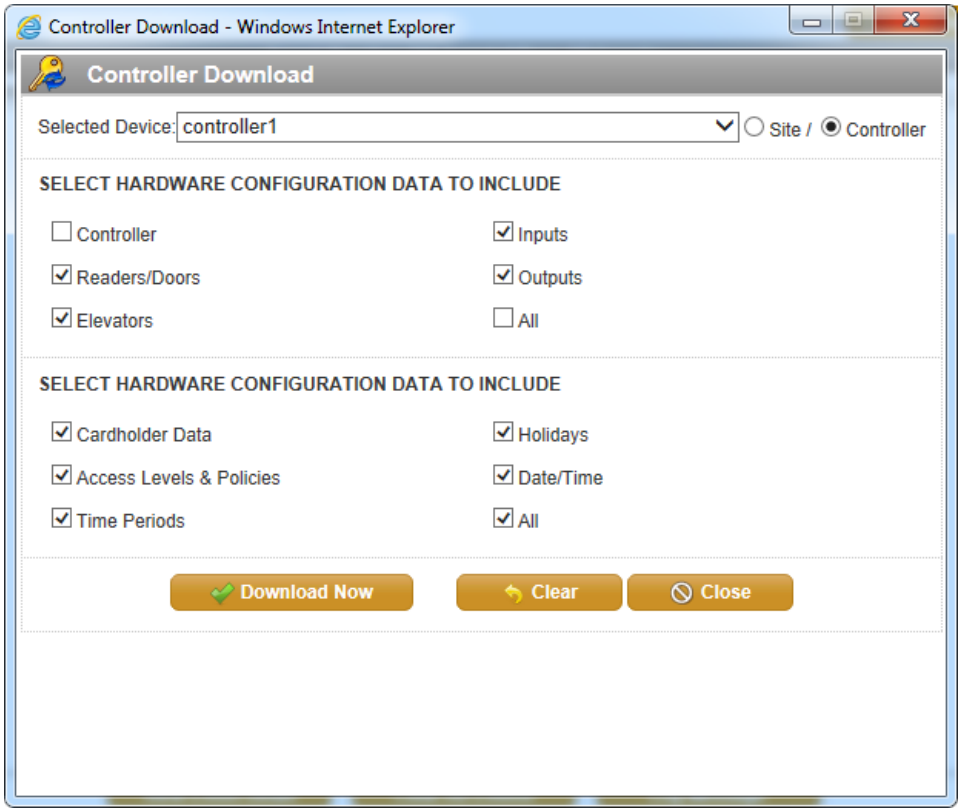
3. Following window should appear. If the window is not showing up, refresh the page.



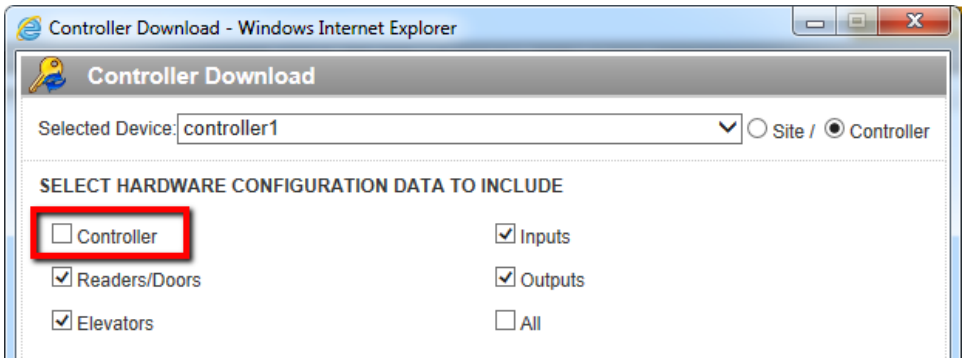
4. Switch **Site/Controller** option to **Controller**. You will get list of controllers in dropdown list.



5. Select what you want to download:



Note: If you do not have a very strong network connection to hardware don't check **Controller** option. This may bring your controller to inoperable state.



6. Click **Download Now** button. Download will start.
7. Make sure that all configuration was successfully downloaded
