My PHONE is my ROOM KEY

SALTO's JustIN Mobile Key technology allows guests to use their smartphone as their room key.

ANITA SHARMA
HOTEL GUEST

"I receive my room key on my phone and it´s up to me if I ask for information at reception or go straight to my room. That is real convenience!"

SALTO'S JustIN MOBILE KEY TECHNOLOGY ALLOWS GUESTS TO USE THEIR SMARTPHONE AS THEIR ROOM KEY.

The intuitive SALTO JustIN Mobile Key app communicates securely via the Cloud and enables a guest to receive a room key online, anytime and anywhere. When guests arrive at your hotel, they can choose to go straight to their room and receive their key on their phone, or they can ask for assistance at reception. It's their choice.

Technologically cutting-edge, SALTO Mobile Key means the end of lost key hassles, expense and waste. Plus, the technology isn't limited to hotel rooms -- it can also be used on main entrance doors, elevators, car park barriers, meeting rooms, etc.

It's the ideal solution for any door where you need to conveniently control access.

THE EVOLUTION OF
GUEST EXPERIENCE

Provide your guests with a hotel experience they value and want to repeat by facilitating their check-in experience without sacrificing their security and comfort.

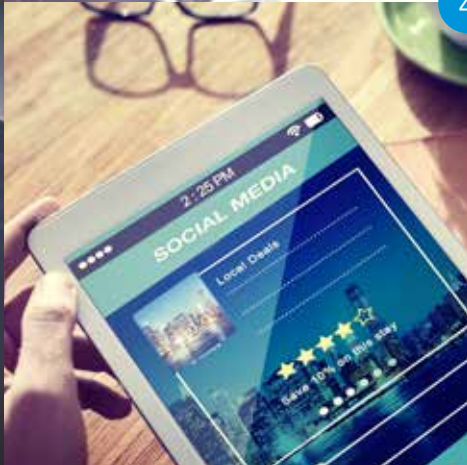

1 Anita Sharma

HOTEL GUEST. *A better guest experience.*

Knowing that I already had my room key on my phone via the JustIN Mobile Key app, and that I didn't need to wait in the reception line for my key, I could get straight to work to handle the last minute meeting details before all the invitees arrived.

2 Lauren Hills

GENERAL MANAGER. *Prepared for technologies today and tomorrow.*

It seems like each day someone comes to me with another technology, another trend, another killer app. ... I don't know who to believe, if there will be one technology that finally "wins," but what I do know is that I'm happy that my SALTO system is flexible and already prepared to work with a wide range of technologies. With SALTO, I feel future-proof.

3 Arnold Smith

RECEPTION DESK STAFF. *Greeting guests instead of issuing keys.*

I love working in a hotel where I can actually welcome guests and have a real conversation about their needs, instead of just rushing about issuing keys. With guests able to receive their keys directly, we avoid the long queue at reception that drive both guests and my front desk colleagues crazy.

4 David Chan

INTERNET-ACTIVE GUEST. *Online reviews that get noticed.*

Written in an online review board: "Forget about a docking station in the room! This hotel is really technologically hip and can send your room key to your phone! Thank you, Hotel VIP! Very cool!"
